SUMMARY

IT graduate from Far Eastern University - Diliman specializing in Web and Mobile application with a strong foundation in software development. I have a deep curiosity for technology and quick to learn new tools. Seeking a Junior Developer role where I can apply technical skills, contribute to a professional environment, and continue improving as a developer.

PROFESSIONAL EXPERIENCE

Internship 1: Simplevia Technologies Inc.   *January 2024- Mar 2025*
Position: **Back End Developer (Laravel + Vue JS + Tailwind CSS)**
- Develop and integrated APIs to support frontend components, ensuring smooth communication between the frontend and backend
- Identifying API Errors & Fixing. Debugged API responses, fixed backend-related errors, and optimized API efficiency for better performance.

Internship 2: Simplevia Technologies Inc.   *May 2025- July2025*
Position: **UI / UX Web designer (Figma)**
- Developed UI components and layouts following client wireframes and project requirements.
- Implemented UI updates based on client feedback and the Team Lead's requirements to improve usability and consistency.
- Deployed to a new project and developed a responsive sidebar component aligned with the existing UI design.
